1. **Troovi** is simply a brilliant little gem for teachers collecting photos from multiple student digital cameras. Simply grab the URL directly above the logo and share it with the whole class. Students simply upload the images from their cameras to that URL (no login required) and within seconds everyone has an online album to share. No more having to bring the digital cameras up to the teacher's desk one at a time. Yay!

Voice:A little bit later in the day, I learned about an active reading strategy. More, this tool has been one of my favorites for my students using it to take notes and Retain notes.

Word:Yay! It's a perfect way to aggregate images from multiple users. Yes, there are always moments where you need to post personal highlights. Yes, there are always moments where you need to post personal highlights.

Zamzam:Perfect files that simply do not occur in top of downloading YouTube videos.

LightShot - Simple and Free Screen Capture Resource

I've been using Snagit for a number of years to do screen capturing and editing of screenshots and enjoy it thoroughly. However, I know from experience that not everyone has access to this paid software, but they still have the need to do screenshots and editing. For those of you that fit in this category, you need to go check out LightShot. LightShot is a very light weight (meaning that it won't burn up a lot of memory or disk space on your computer), free (although you can donate money to them if you find it to be a valuable resources), Windows browser (FireFox, Chrome or IE), or Desktop application (Windows). (whew... was that too many paren?)

I downloaded this yesterday and have had a great time testing it. I've found it to be very powerful as both a screen capturing tool, and an image editor. I've been using the Chrome plug-in, and have had absolutely no problems using it. The Desktop Application is very cool in that you press the "Print Screen" and it gives you the ability to select the portion of the screen you actually want...
In order to teach it, we have to do it. How can we teach this to kids, how can we model it, if we aren't literate ourselves? You need to experience this, you need to explore right along with your students. You need to experience the tools they'll be using in the 21st century, developing your own networks in parallel with your students. You need to demonstrate continual learning, lifelong learning – for your students, or you will continue to teach your students how to be successful in an age that no longer exists.

Or something like that.

So, let me repeat the last part of what I wrote back in February of 2006:

If a teacher today is not technologically literate - and is unwilling to make the effort to learn more - it’s equivalent to a teacher 30 years ago who didn’t know how to read and write.
Using Flickr Photos as a Travel Guide

Every minute, there are thousands of images uploaded to photo site Flickr by people who want to share them with the world. And it turns out that if you look at these photos and where they were taken, you can get a pretty good idea of the best path to take when sightseeing.

Researchers at Yahoo, which owns Flickr, developed a way to gather photos and construct travel itineraries based on the location of the photos and the time between each picture. The tool, which gives people possible itineraries if they select a city and indicate how much time they have, works for five cities — Barcelona, London, Paris, New York and San Francisco.
Select the bookmark toolbar folders you would like to duplicate by quick access filters:

  - 061110a
  - 071310
  - 071610

Select - All | None
Diigolet

Diigolet is not as feature-rich as the Diigo toolbar, but it can be set-up by simple drag-and-drop - no download or installation needed, and it works for all major browsers. Much more powerful than bookmarklets offered by other social bookmarking sites, Diigolet is a "super bookmarklet" that allows you to highlight and add sticky-notes, in addition to simple bookmarking. You can get started by watching a tutorial video.

Firefox

1. Make sure the "Bookmarks Toolbar" is visible. If it is not, go to menu View > Toolbars.
2. Drag this button: Diigolet up to your Bookmarks Toolbar.
Web highlighter for iPad Safari has the following features:

- Highlight the webpage, just like in iBooks;
- Bookmark the page with tags;
- Add sticky note;
- Store bookmarks, highlights, sticky notes in your diigo account.

To Highlight a webpage:

1. Tap the Web Highlighter bookmarklet and a toolbar will show up;
2. Select some text, then click the Highlight button in the toolbar;
3. You can change the highlight color by tapping the highlighted text.

Install Web Highlighter Now!
Welcome to the Diigo Teacher Console

As an educator, your account has been given special privileges to create / manage student accounts and class groups (student email addresses not required)

Create accounts for students and add them to the group: **SharePoint at JCCC**

You are here: Diigo Home > Teacher Console > Create accounts for students and add them to the group

### Confirm Account Details

Please use discretion when creating student accounts. For example, Use First Name + Last Name initial, or Nickname + Initial to protect your students’ online identity.

Two options for student profile:

- [ ] Completely disable personal profile info section for these student(s) *(required for students under 13)*
- [x] Allow students to fill out personal profile info section (optional), and if filled out, *only visible to their friends.*

BEST PRACTICES FOR SETTING UP YOUR COMPUTER PRIOR TO THE MEETING:

- Directly connect to the fastest internet connection available.
- Avoid wireless connections
- Shut down Email/IM and any programs NOT being used for the presentation.
BEST PRACTICES FOR SETTING UP YOUR COMPUTER PRIOR TO THE MEETING:

- Shut down any VPNs and directly connect to the internet.
- Have programs that you are screen-sharing open to the appropriate window and ready to demonstrate - avoid launching and logging into programs while screen sharing.
- Turn off computer “sleep” especially if a re-log in is required.
BEST PRACTICES FOR SETTING UP YOUR COMPUTER PRIOR TO THE MEETING:

- If sharing your screen, remove any photo backgrounds on your computer desktop.
- Optimize room bandwidth to DSL, or better.
- Test your Microphone and Speakers each time if the computer configuration has changed.

Introduction

ZoomIt is a screen zoom and annotation tool for technical presentations that include application demonstrations. ZoomIt runs unobtrusively in the tray and activates with customizable hotkeys to zoom in on an area of the screen, move around while zoomed, and draw on the zoomed image. I wrote ZoomIt to fit my specific needs and use it in all my presentations.
