LOGIC

Students learn how to break down complex problems into smaller solvable portions and then come together to apply the solutions.

PROGRAMMING

LEGO® provides a version of National Instruments LabVIEW software that integrates with all of the sensors and motors connected to the EV3.

LabVIEW
JavaScript
OpenRoberta
Ruby EV3Basic
GenieScratchPerl
LeJOS PythonJava
RobotC LUA

ROBOTICS

Students design and build robots to solve given problems. The robots are then programmed to run autonomously.

Robots can also be remote controlled.

ENGINEERING

Basic instructions are given to build the initial robot. From that point on, students use the kit parts to add functionality.

DOCUMENTATION

Each program must be documented. The documentation includes the processes followed to build and program the robot along with correction to any inconsistencies or issues encountered in producing the solutions.
