Make VR a Reality!

My Journey

- Google Street View @ SIDLIT 2016
- ThingLink Bootcamp - December 2016
- VR Goggles-Walmart Christmas Sale
- Created 360 image of the Collaboration Zone
 - Collaboration Zone-nontraditional computer lab where students can bring or check out technology to complete projects
- Imported image into ThingLink and added media

Make VR a Reality!

What does the Collaboration Zone look like in a 360 image?

Make VR a Reality!

Now, check out the same image with ThingLink!

Make VR a Reality!

Google Street View

- Can be used for virtual tour of locations across the globe with web browser or any Google Cardboard-compatible viewer
- Also can be used to take a 360 photo of any location of your choice!
- Used to need a fancy photo rig, but not anymore!
- Demo

Make VR a Reality!

First, some tips...

- Choose a place with less people
- Don't be afraid to try the process a couple times for the best photo
- Be sure you see all of the orange dots
- Beware, your feet might show up on floor... difficult to avoid

Now, it's your turn!

- Find a location in the room or the hallway
- Take the next 5-10 minutes to create your own 360 image and return
- Take some still photos of any items you might want to feature...

Make VR a Reality!

ThingLink

- Can be used for still images as well as for 360 images
- Upload image
- Add buttons...
 - To zoom in on details and add text
 - To view related photos
 - To view YouTube videos
 - To access a Google Doc, Sheet or Slides document
 - To complete a Google Form as an exit ticket
 - And so many more!
- Demo

ThingLink Activity: [TagIt!](#)

1. Log into ThingLink - <https://goo.gl/6k8Zqj>
 - a. username : vrdemo1@thinglink.com (change 1 to any number up to 40)
 - b. Password: ThingLink (case-sensitive)
2. Choose a VR to clone
3. Add a tag with text and an image
 - a. Feel free to chose a photo you already have available, but...
 - b. You are not limited to the media you create or photos you take
 - c. For stock photos, you might try [Pixabay](#)

Make VR a Reality!

Your Assignment: Put it all together!

- Upload 360 image
 - Save to Google Drive or DropBox and upload via web browser (PC/Mac) or Teleport 360 app on a tablet
- Select *Edit* button to add buttons
- Try adding buttons to your 360 image
- Embed in your LMS
- Due Date: SIDLIT 2018!
- In the meantime, feel free to share with me: peirce@ucmo.edu
